MIURA

This variety of travertine is distinguished by a natural and stratified structure, with irregular veining and porosity characteristic of limestone. The texture tells of its sedimentary origin, making it a material rich in history and charm.

MIURA

STAGE TRAVERTINE

The crossed cut enhances the natural veins of the travertine, creating a dynamic and fascinating pattern. The light and delicate shades of travertine adapt to any furnishing style, from the most classic to the most modern.

NOVA

Created and produced following the beauty of the natural travertine, with both types of veining, which is obtained by cutting the block of stone longitudinally or transversally (vein cut and cross cut). Graphics and veins look extremely natural with the use of the In&out Matt Technology.

MONZA

MONZA is a mix of two very different materials, but at the same time modern and precious. The Italian marble Grigo Soveraia, with a very gritty and decisive character, merges with the timeless Spanish cobblestone coming from the warm Andalusia. The stony background conveys the idea of strength and tranquility, the veins of the marble give light, shades and personality to the project while the pebble gives color and embellishes your floor thanks to its beautiful details.

MONZA

MOTLEY

The collection comes from the mixing of classic split slates, with their clear grains and soft shading, and sedimentary stones with a fine-grained base and stronger colours. The fusion of these two natures generates a new aesthetic reference that doesn't exist in nature.
